Abstract

Your abstract goes here (max ~250 words).

2-sample test for equality of proportions with continuity correction

```
data:  c(1636, 570) out of c(4668, 1898)
X-squared = 14.991, df = 1, p-value = 5.402e-05
alternative hypothesis: greater
95 percent confidence interval:
 0.02901281 1.00000000
sample estimates:
   prop 1    prop 2 
0.3504713 0.3003161
```

1 Introduction

According to Tuan et al. (2015), it is said to xxx. Supported by this we found xyz (Wiwanitkit 2010).

2 Data and Methods

2.1 Data Collection

2.2 Statistical Analysis

3 Results

You could use in line code to provide results such as: Information about penguins were collected and made available by Dr. Kristen Gorman and the Palmer Station, Antarctica LTER, a member of the Long Term Ecological Research Network.

Table 1: Put caption here.

Animal Type	% of Rescues Occuring at Night	Total Number of Animals
Pets	35.0%	4668
Wild Animals	30.0%	1898

As shown in Figure 1, we can see abc. See <https://quarto.org/docs/authoring/cross-references.html> for more about cross referencing plots.

Note! To cross reference a figure, the label must start with fig-xxx.

Figure 1: Your figure caption.

Supported by `?@tbl-penguin-summary`, we can see abc. See https://haozhu233.github.io/kableExtra/awesome_table_in_pdf.pdf for more about styling tables.

Note! To cross reference a table, the label must start with tbl-xxx.

4 Discussion

Table 1

5 Conclusion
